Data Management Made Simple for Timeshare Resorts through the RCI Connect® Platform

SPI Software joins RCI Connect® as a platform partner

PARSIPPANY, N.J. (April 7, 2015) – [RCI](#), the global leader in vacation exchange, recently announced an agreement to add **SPI Software** to **RCI Connect®**, its automated transaction reporting platform. SPI Software joins the growing list of leading property management systems (PMS) available through RCI Connect. The addition of this popular system allows RCI to offer the convenience and cost savings benefits of the RCI Connect platform to even more affiliated resorts.

“We constantly look for the best and most innovative ways to support all of our affiliates and help them lower the total operating cost of their resorts,” said Jeff Parker, senior vice president, product management and resort operations for RCI. “With the goals of increasing efficiency and savings in mind, we developed RCI Connect to streamline activities and give our affiliates faster access to RCI® transaction data. We can now offer this advantage to an even greater pool of timeshare resorts through our partnership with SPI.”

The RCI Connect platform is a powerful, web-based tool that enables affiliates to save time and money by making it easy for resorts to share data with RCI and eliminate manual entry. This smoother, expedited approach to information reporting means owners’ accounts are immediately updated with day-to-day transactions like ownership updates, deposit verifications and bookings. This improves response time and accuracy and helps to create a seamless ownership experience that allows resorts to have a single source of timely information.
